American Omni Trading

THUNDERER TIRES

For 30 years, American Omni Trading (AOT) has been a leading importer and marketer of high-quality, value priced tires. From wheelbarrow to ATV, agricultural to OTR, touring to ultra-high performance, light truck to TBR, and everything in between, AOT provides its customers with the scope and flexibility they need to succeed. AOT tires come equipped with the brand's No Questions Asked, 25/365 Free Replacement Limited Protection Policy, so whether your journey takes you through downtown streets, corn fields, or backwoods trails, AOT is ready to help drive your future.

AOT prides itself on the quality of its tires and its exceptional customer service team. The business is built on strong customer relationships and a dedication to its values: integrity, passion, and professionalism. These values set the tone, help create the company culture and are fundamental to AOT's success.

THUNDERER TIRES

Distributed exclusively by AOT, the Thunderer Ranger Series offers a comprehensive line of light truck, SUV, CUV, and specialty commercial tires.

The Ranger A/T® is Thunderer's next generation of aggressive, all-terrain tires designed to kick-start your adventure. With 3D siping technology and rigid interior blocks, the Ranger A/T provides unbeatable handling on wet and dry surfaces, while the studdable shoulder lugs drive through mud, snow, and ice with ease. Backed by a 45,000-mile limited treadwear protection and AOT's Limited Protection

Policy, the Ranger A/T is the ultimate all-terrain tire.

The Ranger A/T is a premium all-terrain tire with tread designed to maximize traction edges for excellent on- and off-road handling. A closed shoulder ensures confident handling in all conditions. Wide primary grooves and optimized siping technology provide maximum water evacuation for enhanced traction and stability. Carrying a 55,000-mile limited treadwear protection and backed by AOT's Limited Protection Policy on all sizes, the Ranger A/T is ready to work.

The Ranger SUV is designed for today's crossovers, SUVs, and light trucks. This all-season tire provides a quiet, smooth ride with confident handling and enhanced traction. The Ranger SUV features multiple speed ratings and load carrying capacities for proper fitment. With a 60,000-mile limited treadwear protection and AOT's Limited Protection Policy, the Ranger SUV delivers the value and confidence expected from Thunderer.

The Trac Grip M/T is a maximum-traction on- and off-road radial with an aggressive attitude. The open and tiered tread block elements ensure maximum traction in extreme conditions. The Trac Grip M/T is available in sizes up to 37 inches overall with wheel diameters up to 22 inches. Carrying the load is not an issue as the Trac Grip M/T is available in 12-ply ratings (some sizes). Backed by AOT's Limited Protection Policy on all sizes, the Trac Grip M/T is ready to conquer any terrain.

The Commercial L/T is a commercial grade light truck tire with multi-ply casing construction to handle heavy workloads. Its five-rib highway-oriented tread pattern allows for maximum trouble-free miles while its beefy, solid shoulder design resists scrubbing. Double steel belted plies provide puncture resistance and durability. The CLT is backed by AOT's Limited Protection Policy on all sizes.

The ST Radial is the workhorse of the Ranger Series. This Thunderer is a Specialty Trailer tire designed with a micro-positioned fiber reinforced belt package for extra strength and durability. The tread design supports low-rolling resistance and improved heat dissipation, enhanced hydroplaning resistance, and increased stability. The ST is backed by AOT's Limited Protection Policy on all sizes.

25/365 LIMITED PROTECTION POLICY

All Thunderer tires are backed by AOT's No Questions Asked, 25/365 Free Replacement Limited Protection Policy and the unbeatable mileage policy (where applicable). The policy fully covers all Thunderer brand radial passenger, light truck, and specialty trailer tires should one become unserviceable due to defective workmanship, materials, or road hazard during the first 25% of useable treadwear or one year from date of purchase, whichever occurs first. ●

A.R.E. Accessories

DOUBLECOVER: THE INDUSTRY'S FIRST DUAL FUNCTIONING BED COVER

A.R.E. Accessories is a leader in truck caps, covers, and a full line of accessories geared to outfit your truck for the jobsite. Whether you need extra storage, enhanced security, or more functionality, A.R.E. has the right products to get you to work.

DUAL FUNCTIONALITY

Trying to decide what type of bed cover best suits your needs? Don't. A.R.E.'s DoubleCover allows you to have quick and easy bed access with its lift function via the heavy-duty front hinge and lift-assist system while achieving unrestricted bed access for larger items with its retracting feature.

The DoubleCover's aluminum construction provides the strength and durability required for the jobsite, while the textured powder coat finish complements the styling of today's trucks. Your truck's tailgate lock acts as security for the retracting application, while a center handle with lock secures the lifting operation.

As the DoubleCover is retracted it rolls up into a textured powder coated diamond plate aluminum canister located at the front of your bed. This canister is specifically designed to allow for easy cleaning when the cover is in the lifted position. With other retracting covers it is difficult, if not impossible, to clean out the front canister should any debris, leaves, etc. make their way into the canister. A.R.E. also added recessed handles on both the driver and passenger side of the cover for convenience.

A quick twist of the rear center handle opens the cover on its heavy-duty front hinge, which runs the full width of the cover. A.R.E.'s tested and proven lift assist arms and gas props allow for the cover to open quickly with little effort from the user. To close the cover, pull down on the

convenient strap and allow the cover to latch into place.

Additional standard features include a battery operated center mounted LED light.

CARRY MORE

Get more out of your DoubleCover by adding a roof track system that allows for Yakima crossbars or other accessories to be added, giving you the ability to carry and organize additional cargo. Use the crossbars for ladders, materials, or add additional accessories like the A.R.E. Ascend roof basket. With the crossbars added, you are still

able to use both the retracting and lift functions of the cover. The crossbars can be easily removed when you don't need the extra carrying capacity.

The DoubleCover is rated for 550 lbs evenly distributed across the cover.

INNOVATION FOR TODAY

The DoubleCover was born out of a desire to implement what A.R.E. learned from producing hard, one-piece fiberglass bed covers for over 25 years, but adding the ability to have full bed access without removing the cover completely. A.R.E. found that most customers liked the style and function of a hinged cover for the ease of access to the bed, but desired the added functionality of other covers because of the ability to carry larger items that would be taller than the

truck's bed rail. The DoubleCover, as seen today, is the result of this customer feedback.

A.R.E. also sees changes in the customers' styling preferences—even on the jobsite. Just because it's a work truck, doesn't mean it needs to look like one. It is a quick, but lasting, representation of your company, which is why A.R.E. put an emphasis on not just designing a cover that provides a functional solution, but also one that complements your company's trucks nicely.

The DoubleCover is available for all new body style trucks in extra short, short, and long beds with more applications to come.

OUTFIT WITH CONFIDENCE

The DoubleCover is backed by a limited-lifetime warranty. It can be ordered and installed through any A.R.E. dealers throughout the US and Canada or authorized online retailers. Manufactured in the heartland of America (Ohio), A.R.E. knows you need your truck to withstand your jobsite, which is why its passion is to manufacture the perfect companion, backed by the industry's best support and warranty.

50 YEARS OF EXPERIENCE

Founded in 1969, A.R.E. has covered truck beds with the most innovative, highest quality caps and covers for 50 years. At its ISO-9001:2015-certified manufacturing facilities, A.R.E.'s 600-plus employees create the truck caps and accessories that are sold through a network of more than 650 independent authorized dealers. ●

ARE

Azuga, Inc.

THE TECHNOLOGY YOU NEED AT A PRICE YOU CAN AFFORD

Simple to use, affordable, customizable, and easy to install, Azuga Fleet works for you and your drivers. All Azuga software and hardware is geared toward providing safety and savings.

DRIVER ACCOUNTABILITY

Showing location, stops, idle time, and more, Azuga Fleet makes it easy to track drivers on the job with a map view that allows you to see where your fleet is at all times. You can monitor and curb wasteful habits such as excessive idling and set custom geofences to keep deliveries on track. Take advantage of information—speeding, hard braking, cell phone distractions, and service warnings—to keep both drivers and vehicles performing at their best.

Leverage the valuable information captured every time your fleet is dispatched to maximize efficiency, reduce operating costs, and reward top drivers. Receive vehicle alerts instantly, enabling your service team to perform maintenance before a costly repair is needed. When payday arrives, you'll know you're paying the right amount for the right work. Comprehensive, yet easy to use, Azuga Fleet provides immediate insight into your operations from safety, accountability, and driver rewards to fleet efficiency.

DASHCAM VIDEO

Seventy percent of accidents are not the fault of your drivers. Dashcam video proves it. Be prepared for anything that comes your way with smart detection software and the accuracy of SafetyCam. The camera captures road events and driver behavior, giving you a clear picture of what happens on the road when it matters most. SafetyCam works

with Azuga Fleet and Azuga FleetMobile to provide an integrated solution that delivers real benefits that help reduce risk and improve fleet safety. Customize your solution based on driver scores, deploying both Azuga Fleet and SafetyCam to your riskiest drivers.

DRIVER SAFETY

The only program of its kind, Azuga's integrated gamification-based driver rewards program makes it easy for fleet managers to track driver safety and reward good drivers. It incentivizes drivers to stay on top of their game and makes it easy for them to cash in their rewards when they do. Drivers can also share accomplishments on social media. Go from "Gotcha" culture to "Good Job" culture. When drivers compete, everyone wins.

Since scores are based on safety, a small improvement reduces fuel consumption and more importantly, makes the fleet safer and reduces accidents. Driver scores tell you which drivers need additional coaching and can also be used to reward the safest drivers.

Additionally, Azuga's distracted driving technology allows employers to monitor cell phone use when vehicles are in motion and limit distractions, while Azuga Coach helps improve poor driving habits with personalized online video-based training solutions tailored to fit every driver.

FLEET EFFICIENCY

Azuga FleetMobile lets businesses engage with their drivers, reward them for safe driving, and give them tools to

improve their operations. It includes a rewards management capability that lets managers deliver rewards and provides scores and a leaderboard to drive competition among drivers. When a driver uses FleetMobile, data is captured from the vehicle, creating a comprehensive trip log; trips can also be tagged as business and personal. Badging and push notifications alert drivers to messages, speeding events, rewards, and more.

CONCIERGE SUPPORT

Azuga understands each fleet has different needs. Its concierge support team is driven by one aim: to ensure you get the most value from your relationship with Azuga. From onboarding and training to support, the goal is to ensure that you have the best product, experience, and assistance. Azuga will also help you tune the solution for your business with custom reports, so you can pinpoint areas that work well and which need improvement to impact your bottom line.

Azuga Fleet can help you reduce operating costs, improve driver behavior, save on fuel, improve customer service, and so much more. Azuga customers have saved on average \$9,462 annually, reduced accidents by 38%, and reduced speeding citations by 57%. See why fleet managers prefer Azuga Fleet vehicle management software. ●

PAINT AND PROTECTIVE COATINGS IDEAL OVER THE LONG HAUL

As a world-leading supplier of transportation coatings, PPG offers a wide spectrum of paint systems and specialty products to fit the market-specific working conditions of all types of work trucks. Take undercarriage protection as an example. Depending on the level of performance required, PPG can recommend a cost-effective solution from a full array of alkyd, epoxy, and urethane primer technologies.

user-friendly, excellent color matching, very good UV resistance, good chip and corrosion resistance.” Brutus work trucks are primarily used in the forestry, construction, mining, and petroleum industries in Penticton, British Columbia.

DEL FLEET ESSENTIAL

Turchak’s operation employs a variety of PPG products for its builds, in particular the DEL FLEET ESSENTIAL® paint system, a value-conscious

system receives high marks from work truck builders across North America.

“We used a number of brands before switching to Essential, and the single-stage system has a higher quality finish, is more cost-effective, and is much easier to use,” relates John Cooper of Diamond Truck Body Manufacturing of Stockton, California, the company widely recognized for its Diamond Truck Body.

“When it comes to color matching, the best color matches I’ve had with any OEM color is with *Delfleet Essential*,” adds Christian Beaulieu of Multi Entreprises, a Canadian manufacturer of gravel haulers, fuel trucks, emergency units, and other commercial vehicles.

BEYOND PAINT

PPG acknowledges that it takes more than a good paint system to meet the needs of its customers. “We place equal importance on providing the latest color tools, technician training, and support required to ensure our customers’ success in the paint booth,”

J. J. Wirth, PPG segment manager, commercial coatings, says.

The *Delfleet Essential* product line is serviced by PPG’s network of independent distributors and its staff of commercial coatings experts located across North America. ●

Find out more, visit

www.ppgcommercialcoatings.com.

Or say you need maximum protection for a unit that will face snowy roads and highly corrosive magnesium chloride road salt. You can find the solution with a PPG zinc primer-based urethane topcoat system.

“We’ve been using PPG products for 25 years,” Gerry Turchak of Brutus Truck Bodies says. “The main benefits are always consistent finish—no surprises,

system that’s easy to use. The compact mixing system requires only a minimal inventory to offer thousands of color options. Colors can be mixed in either single-stage or basecoat/clearcoat qualities, and for added convenience, pre-mixed black, white, and flat black colors are available.

Echoing Turchak’s praise for PPG products, the *Delfleet Essential*

THE RIGHT PAINT IS ESSENTIAL WHEN DURABILITY IS CRUCIAL.

We're here to improve your paint operation. Call (800) 647-6050 to speak with a PPG specialist today.

Safe Fleet

MEET THE SMART SAFETY COMPANY

Safe Fleet is driven by a vision—and an admirable one at that. Guided by the belief that Zero Safety Incidents is an achievable goal, it is on a mission to reduce preventable deaths and injuries in and around fleet vehicles.

Founded in 2013 and headquartered in Belton, Missouri, Safe Fleet redefines what fleet safety means with one-stop access to customized, integrated, and intelligent solutions that answer today's safety needs and anticipate tomorrow's challenges. Its portfolio of best-in-class equipment is developed, manufactured, and serviced by industry-leading brands you've come to know and trust—brands such as American Van, American Midwest Fleet Solutions, Bustin, FRC, Prime Design, Pulltarps, Randall, Roll-Rite, ROM, RVS, and SEON.

That along with its 1,700 employees and 14 manufacturing locations, serve customers across North America, Europe, and Asia. The company innovates and delivers the smart solutions that fleets need to survive and thrive in a changing world and

ensure that drivers, passengers, and pedestrians arrive home safely.

POWER OF THE PLATFORM

Safe Fleet's wealth of industry knowledge enables its 'Power of the Platform' ethos, placing a complete range of work truck safety products and the expertise behind them at your fingertips. From ladder racks, safe vehicle access products, tarp systems, and vehicle organization to temperature control products, lighting, video camera systems, and more—Safe Fleet is your one-stop-shop for everything fleet safety.

VALUES MATTER

 **Safety Driven:** Safe Fleet believes that everyone deserves to be safe; without safety first, efficiency and productivity are not even a possibility.

 **Customer-Focused:** Safe Fleet is guided by market needs and customer satisfaction during the design and delivery of its advanced safety solutions.

 **Respect and Trust-Based:** Safe Fleet fosters an environment of mutual

respect and teamwork, acting as trusted advisors to co-workers, customers, and the industry at large.

 **Innovation-Led:** Safe Fleet is entrepreneurial in spirit; never satisfied with the status quo and always striving to drive safety forward through continuous innovation.

 **Performance Minded:** Safe Fleet is committed to delivering profitable growth through a mindset of continuous improvement.

WHY SAFE FLEET?

With over 100 years of combined industry history and innovation, Safe Fleet is a trusted advisor for fleet safety. Safe Fleet's deep well of fleet know-how, market-leading safety brands, and unrelenting dedication to improving productivity while reducing the risk of injury to drivers, passengers, and pedestrians makes fleets smarter and people safer. Safe Fleet is Driving Safety Forward™.

Timbren

A work truck needs to be dependable, a vehicle you can rely on. Whether it's a cement mixer, mobile crane, dump truck, or wrecker, it's important to keep an eye on things under the hood. You would never think of ignoring regular maintenance, such as changing engine oil and filter and checking engine coolant, brakes, power steering, and transmission fluid.

But we forget to keep an eye on things under the frame. Often, it's the suspension that fails to go the distance on those really demanding jobs. The constant load of heavy equipment puts a major stress on a work truck's suspension. These huge loads can damage the average leaf and air suspension.

Most would agree: When the going gets tough, a work truck must keep going.

FROM REACTIVE TO PROACTIVE

When it comes to maintaining a fleet of work trucks, there are basically two groups: reactive and proactive. On the one hand, there are those who

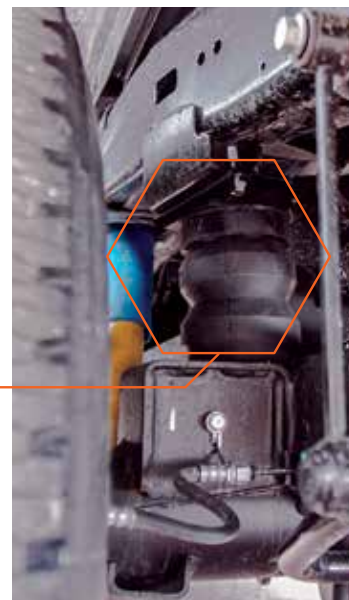

wait for something to break, and then deal with it. Their philosophy is "if it ain't broke, don't fix it." They will spend money only when it's absolutely necessary. This is the reactive group. On the other hand, there are those who are more proactive. They don't wait for problems to materialize. They act now to prevent them from

happening, because they want their vehicle at the jobsite, not in the repair shop.

STRONGER THAN STEEL, MORE RELIABLE THAN AIR

In order to help keep your truck out of the repair shop and at the jobsite, Timbren developed a suspension helper that is actually stronger than steel and more reliable than air. Timbren's hollow rubber springs are stronger than steel because of their progressive spring rate. Leaf springs are linear, capable of adding only

800 lbs to the spring rate. Timbren helpers, on the other hand, can add up to an additional 12,000 lbs to the overall spring rate.* They are more reliable than air because they don't need pipes, hoses, or compressors to make them work. In other words, Timbren hollow rubber springs are maintenance free.

*Increasing the spring rate does not increase the GYW

Aeon® rubber springs are made of natural rubber and sit between the frame and the axle. They act like a shock absorber and a stabilizer, designed to level the load, absorb road shock, and help reduce body roll and sway.

If the leaf springs on your wrecker threaten to buckle under the weight of an extra-heavy load, take preventive measures. Similarly, if the air suspension on your big rig sways dangerously threatening to roll the vehicle, there's a product that will dodge that bullet. In fact, there are over 450 products that fit virtually every make and model of light-duty and heavy-duty trucks and trailers. Timbren SES products are easy to install and require zero maintenance.

No matter the weight classification of your work truck, there's a Timbren product that can prevent the inevitable from happening. A few hundred dollars now prevents thousands of dollars in repair bills. Timbren stands behind every SES product by offering a lifetime warranty and a 100% customer satisfaction guarantee. ●

Find out more, visit www.timbren.com or call 800.263.3113.

TIMBREN SES

Suspension Enhancement Systems

Timbren SES kits are designed to keep the vehicle level at all times and prevent roll and sway. The Aeon® rubber springs found in every Timbren SES kit have a progressive spring rate which means you are guaranteed a soft, comfortable ride at all times.

THE RIGHT GEAR FOR HANDLING THE TOUGH STUFF

Better Ride Quality

Satisfaction Guarantee

Added Stability

Zero Maintenance

Easy Installation

Lifetime Warranty

TOWING

Don't despair if the rear suspension of your tow vehicle drops to the ground when you hook up your trailer. Timbren SES kits prevent suspension sag, eliminate body roll and control sway.

SNOWPLOWING

Frustrated when you lift your plow and the front end of your truck droops? Do what the pros do: Level out your truck by installing a Timbren SES kit. Not only that, you'll increase drive axle traction on the rear.

WORK TRUCKS

Your work truck's suspension takes a major beating under the stress of heavy loads. Keep your vehicle out of the repair shop and at the job site by protecting your suspension with a Timbren SES kit.

TIMBREN.COM

Boss Industries

CHOOSING THE RIGHT AIR COMPRESSOR

Many times choosing the right method of air compression is just as important as choosing the capacity (CFM) and pressures (PSI). Think about it like this: Do you need continuous air, e.g., jack hammers, piercing tools, or running any air tool for longer than 20 minutes at a time? Or do you require intermittent air, e.g., impact wrenches, drills, or any air tool that will be used for a short duration of time, like removing lug nuts on a wheel?

If you need continuous air, then you need a rotary screw-type compressor. If you need intermittent air, then you want a piston-type compressor.

THE DIFFERENCE

A rotary screw compressor is air-on-demand, meaning you have immediate, continuous air that can run for hours or even days. The bonus is there is no air reservoir (tank) needed. This design uses two rotating lobes that are in an oil-flooded system. The oil serves primarily three functions: 1) it seals the tolerances between the lobes (screws) to create compression; 2) helps lubricate the bearings on the rotors; and 3) it transfers the heat from compression to the cooler.

A piston-type compressor (reciprocating compressor), uses the piston and rings to build pressure and fills an air reservoir. This requires a short pressure build time to fill the appropriate size air reservoir but is ideal for on/off, short air usage applications.

WHAT'S NEXT?

You need to define what CFM you need by what tools you use. Boss Industries recommends sizing your compressor to the rated specifications for your tools to ensure the life span and investment in your air tools.

Choosing the right type and size of an air compressor is just as important as choosing the right tool for the job. ♦

CURT Group

PROFESSIONAL STYLE FOR YOUR BUSINESS

For your fleet truck or van, CURT Group's CURT, LUVERNE, ARIES, and UWS products provide the functionality, safety, and professional style you require for your business. The companies offer towing products, cargo solutions, running boards, and grille guards, giving you a complete solution to outfit your fleet.

CURT GROUP BRANDS

LUVERNE has manufactured quality automotive accessories in the United States since 1963. Its brand is nationally known and respected and offers a broad base of quality, functional aftermarket accessories for pickup trucks and commercial vans.

CURT offers a complete line of towing products and is the leading

manufacturer of USA-made custom-fit trailer hitches. It offers the broadest selection of custom-fit receiver hitches for nearly every vehicle on the road today. It also offers gooseneck, fifth wheel, and weight distribution hitches. For everything from passenger cars and vans to full-size pickups and SUVs, CURT is "The First Name in Towing Products®."

ARIES offers the perfect combination of style and durable construction, specializing in custom-fit grille guards, bull bars, side bars, and running boards as well as Jeep Wrangler and Jeep Gladiator accessories.

UWS is a leading manufacturer and designer of USA-assembled truck tool boxes and accessories. Its products

are built to the highest quality standards, offering tough and reliable storage solutions for professional tradesmen. It offers a full range of truck tool boxes, transfer tanks, chest boxes, dog boxes, and other truck storage solutions. ●

Dakota Bodies

CUSTOM IS THE STANDARD

Since 1997, Dakota Bodies has designed and manufactured utility and service truck bodies. Over those years, the company has grown into two manufacturing and training facilities in Watertown, South Dakota, and recently added a manufacturing facility in Liberty, Missouri, to support production demands.

CUSTOMIZED FOR YOUR BUSINESS

What makes Dakota Bodies stand out is its innate ability to design and provide custom solutions for each body manufactured. Every trade requires different skills and specific tools, which is why Dakota Bodies thinks it is important that your truck body functions exactly how you need. Dakota Bodies'

skilled team of experienced designers works diligently to create bodies that are effective for specific applications. Dakota Bodies is continually developing new and improved solutions for today's transportation needs. Dakota Bodies' commitment to excellence and customer satisfaction is what keeps it growing.

The history of growth and innovation has led the company to be one of

the nation's top choices in the utility and service industries. As a growing manufacturer, Dakota Bodies continues to invest in its future with new technologies and techniques to better serve its customers and employees. ●

INTRODUCING THE NEW DAKOTA CANOPY UTILITY BODY

- > **ALUMINUM CONSTRUCTION OPTION**
- Reduced fuel consumption & increased payload capacity
- > **POWDER COAT PROTECTION**
- Superior rust and corrosion resistance.

AVAILABLE IN ALUMINUM, GALVANNEAL OR STAINLESS STEEL.
FOR MOST CAB CHASSIS AND VAN MAKES AND MODELS

This versatile body can be fully customized to serve the needs of multiple job trades including: utilities, HVAC/plumbing, telecommunications, electrical and more!

© 2020 DAKOTA BODIES, LLC

Extendobed

NEVER CLIMB IN THE BACK OF YOUR TRUCK OR VAN AGAIN

Extendobed improves worker productivity by getting you on and off the jobsite quicker.

No wasting time looking for tools/supplies, climbing into your van/truck, or crawling under a covered service body or bed topper. Extendobed brings your supplies to you.

Extendobed can also increase your ROI. One Extendobed customer now completes one extra service call per truck, daily. The company's Extendobeds paid for themselves within three months.

REDUCE INJURIES

Extendobed also reduces injuries because workers are not picking up heavy items from awkward angles or climbing in and out of their vehicle. Avoiding even one back injury claim can pay for a small fleet of Extendobeds.

ONLY EXTENDOBED OFFERS:

- Extension past the taillights—over 110%—allowing access to the entire bed
- Load capacities up to 3,000 lbs that can be point-loaded
- Fully customizable designs for trucks, vans, service bodies, and trailers
- 20-year warranty = lower cost of ownership
- Increased productivity
- Reduced workers comp injuries

EXTENDOWALL

The new ExtendoWall™ is designed to improve the efficiency and productivity of work vans, along with their storage capacity. Slide equipment/supplies out to you. It extends from either the side or back doors. Half-bed or full-bed width and up to 3,000-lb capacity is available. The deck, wall, and any storage needs are fully customizable. ●

Hannay Reels

DURABLE, DEPENDABLE, AND HIGHLY ADAPTABLE REELS

For over 85 years, Hannay Reels has served as the leading manufacturer of custom hose and cable reels for the work truck industry. With more than 3,800 reel models, Hannay Reels delivers high-quality, low-maintenance custom reel solutions for a variety of industries.

Hannay reels are compact ensuring a small footprint and allowing them to fit into a variety of compartments. Hannay also offers the flexibility of multiple mounting options. Designed with solid construction and well-built frames, Hannay reels allow for quick and easy maintenance, smooth dispensing, and stand up to the punishment delivered by tough road conditions. Hannay makes part replacement simple. That means longer life spans for every reel and less money out of your pocket.

Hose and cable reels from Hannay are highly adaptable, serving a wide variety of work truck operations, including:

- Dispensing: grease, oil, water, antifreeze, DEF fill-up, petroleum, and more
- Hydraulic/pneumatic power tools
- Service/lubrication hose for heavy construction equipment
- Electric cable for lights and tools, engine warm-up, battery charging
- Gas/arc welding
- Washdown/pressure washing
- Vacuum/suction
- Fueling: petroleum, diesel, DEF, and more

Based in Westerlo, New York, Hannay stores large quantities of high-quality raw materials and parts in its 2-million-sq-ft facility, allowing Hannay to build and deliver reels without delay. Everyone in Hannay's onsite sales group has experience in building reels, so they can respond to your needs efficiently and accurately. All reels are built to order. ●

HDC Poplocks

THE EVOLUTION OF P.O.P.LOCKS

PopLocks™ is the original power locking product introduced in the 1990s. It was a first of its kind by providing a different approach to power locking. What used to be considered a retrofit luxury product is now considered a basic and necessary feature to modern work trucks.

Poplocks' ability to retrofit nearly all compartment locks now comes with a whole new convenient feature with the introduction of LAC™. Its quality is in its name: Lighted Actuator Cover. The intention is to be a feature-add to traditional power locking components. When PopLocks with LAC is installed on the vehicle, its low-profile design allows for doors to close and not disturb shelves and their contents. Using G4 COB LED, this cover provides

ample lighting at night into the compartment, cross bed toolbox, and truck bed.

WELCOME, POPLIGHT

PopLight™ is the brand's newest product line, which introduces a different way of lighting. Intended for the interior of doors or cross bed toolboxes, this V-shaped light provides great lighting in all directions. Its sleek low-profile design allows for doors to close without bumping shelving.

Both LAC and PopLight can be installed as an OEM option or retrofitted as an aftermarket add-on. They can be used alongside Poplocks controllers to provide power lock and light management. Be warned, the G4 COB LED built-into these products are

seriously bright. So bright in fact it is recommended that you do not look directly at them because it may cause temporary night blindness.

WIRE HARNESES, CONTROLLERS, & MORE

Included in this new family are controllers, switches, keypads, and wiring harnesses that provide new solutions to Poplocks' customers by simplifying and reducing installation costs. As an example, the brand offers a complete plug-and-play wire harness kit (WH6-LAC), which is pre-wired to handle the LED feature of LAC, resulting in "the best compartment lighting at no additional labor cost." ♦

HELPING YOU SEE YOUR STUFF.™ **HDC**

LAC™

LIGHTED ACTUATOR COVER

- Lighted Actuator Cover - "LAC" uses integrated ultra-bright G4 COB LED's
- Designed to cast the most light into an open compartment
- Use direct switching to trigger or use HDC controllers with light output & RCL-10 wireless light controller

CAUTION: This light is so bright it could cause temporary night blindness. Avoid direct visual contact.

Link Manufacturing

ALUMINUM RAMPS

Link Manufacturing develops an extensive range of aluminum ramps that provide safe, easy, and economical solutions for your loading and handling needs. Whether you require a straight, bifold, trifold, swivel, lightweight, heavy-duty, or customized cargo ramp solution for your needs, you can be confident that each Link aluminum ramp is built to perform in the most challenging conditions. All Link aluminum ramps are engineered, tested, and manufactured to the highest quality standards right here in the USA.

SWIVEL RAMP

Link put a new twist on aluminum ramps. Its swivel ramp offers unmatched flexibility for loading and unloading any sized cargo with

its 180-degree rotation and two storage locations. The swivel ramp mounts in the rear stored position like a traditional folding ramp but can swing to also be stored inside, behind the wheel well—providing options for instances when a loading ramp isn't needed.

MOUNTED RAMPS

Link Manufacturing developed a broad array of deployable mounted aluminum ramp solutions engineered for commercial vans and box trucks. Link's lightweight, low-profile mounted aluminum ramps vertically mount just inside a vehicle's rear or side doors. Each mounted ramp is made from high-strength aluminum and engineered for simple installation and ease of use. All

Link mounted ramps are fast, easy, and convenient to deploy.

PORTABLE RAMPS

Link's portable aluminum ramps are available for both lightweight and heavy-duty applications featuring either folding or straight designs. The extensive range of portable ramps provide users with safe, durable, and economical solutions for their cargo loading and handling needs. An optional, high-friction, perforated deck surface is also available for applications where exposure to ice, oil, moisture, and other slippery substances is common. ●

Link | Swivel Ramp
LSR90 Series

GET MORE OUT OF YOUR WORK VAN OR FLEET

PRODUCTIVITY
The Swivel Ramp is designed with 180° rotation allowing for unobstructed access and cargo space efficiency.

VERSATILITY
Quick-release locking modules allow the ramp to be stored both in the rear (1) and wheel-well position (2). The ramp also swivels out (3) and locks in position for quick access.

QUALITY
Our swivel ramp is an industry trusted product, made in the USA, and built with materials that could outlast your van.

Trim-Lok, Inc.

A PERFECT SEAL IN A SNAP

Trim-Lok, Inc. is a global leader in thermoplastic and thermoset rubber profile extrusions. Its innovative and traditional processing methods enable the company to meet the most challenging requirements for top-quality trims and seals. Trim-Lok's product development team brings high caliber mechanical design, excellent materials knowledge, and strong manufacturing expertise to design parts and tooling. The team fabricates them to your exact specifications ensuring performance and value using the latest in 3D CAD software and FEA, reverse engineering, rapid prototyping, internal lab testing, onsite fit trials, and more. From engineering to inspection, Trim-Lok can repeatedly provide complex shapes within specific tolerances with extreme accuracy and exacting finishes.

INNOVATIVE ENGINEERING

Trim-Lok's most recent product for the work truck industry is a revolutionary Peel & Stick Fender Flare that requires no drilling and no bolting. Trim-Lok combined its plastic Edge Trim, 3M Automotive Grade Tape, and a modernly designed flare to create a Fender Flare that is quick and easy to install. Its Peel & Stick design eliminates the risk of rust and corrosion usually seen with the traditional drill and bolt installations and offers a time, labor, and SKU savings—only one part to order, inventory, and install! Many of Trim-Lok's trim and seal parts are at the forefront of innovation and the company is always ready to bring its knowledge to work on a new opportunity! ●

Coxreels

TDMP SERIES

Designed for use with hydraulic tools and accessories, Coxreels' TDMP Series features:

- Dual hydraulic spring rewind reels with one-sided access for both the spring and the swivel
- Supply and return lines in the same side of the reel into an external fluid path via hydraulic swivel that also houses a spring cartridge motor
- A unique design that allows service of the main components without removal of the reel
- Improved space use: reel can be installed with the back side of the drum against a wall without concern for incoming hose lines
- A capacity of up to 50 ft with triple axle support, dual arm guides, and stainless steel hose guide rollers
- Heavy gauge steel construction, durable polyester powder coat, rolled and ribbed discs, an industry leading two-year warranty, and manufactured in the USA. ●
