American Omni Trading

AMERICUS TIRES

For over 30 years, American Omni Trading (AOT) has been a leading importer and marketer of high-quality, value-priced tires. From wheelbarrow to ATV, agricultural to OTR, touring to ultra-high performance, light truck to TBR, and everything in between, AOT provides its customers with the scope and flexibility needed to succeed. Its tires come equipped with AOT's No Questions Asked, 25/365 Free Replacement Limited Protection Policy, so whether your journey takes you through downtown streets, corn fields, or backwoods trails, AOT helps drive your future.

AOT prides itself on the quality of its tires and exceptional customer service team. The business is built on strong customer relationships and a dedication to its values: integrity, passion, and professionalism. These values set the tone, help create its culture, and are fundamental to AOT's success.

AMERICUS TIRES

Distributed exclusively by AOT, Americus offers a comprehensive line of light truck, SUV, CUV, and specialty commercial tires.

The Rugged A/TR is the next generation aggressive all-terrain tire designed for your everyday commute and your off-road adventures. With advanced 3D siping technology, rigid interior tread blocks, and an enhanced 3PMSF tread compound, the Rugged A/TR provides exceptional handling on wet and dry surfaces, while the massive and studdable shoulder lugs drive through mud, snow, and ice with ease. Carrying an upgraded 50,000-mile limited treadwear protection and the brand's No Questions Asked,

25/365 Free Replacement Limited Protection Policy on all sizes, the Rugged A/TR is ready for whatever path you follow.

The Rugged A/T is a premium all-terrain tire with a tread designed to maximize traction edges for excellent handling on- and off-road. A closed shoulder ensures confident handling in all conditions. Wide primary grooves and optimized siping

technology provides maximum water evacuation for enhanced traction and stability. Carrying a 55,000-mile limited treadwear protection and backed by a Limited Protection Policy on all sizes, the Rugged A/T is ready to work.

The Recon CUV is designed for today's crossovers, SUV, and light trucks. This all-season tire provides a quiet, smooth ride with confident handling and enhanced traction. The Recon CUV features multiple speed ratings and load carrying capacities for proper fitment. With a 60,000-mile limited treadwear protection and a Limited Protection Policy, the Recon CUV delivers the value and confidence you expect from Americus.

The Rugged M/T is a maximum-traction on- and off-road radial with an aggressive attitude. The open and tiered tread block elements ensure maximum traction in extreme conditions. The Rugged M/T is available in sizes up to 37 inches overall with wheel diameters up to 22 inches. Carrying the load is not an issue as the Rugged M/T is available in 12-ply ratings (some sizes). Backed by

a Limited Protection Policy on all sizes, the Trac Grip M/T is ready to conquer any terrain.

The Commercial LT is a commercial-grade light truck tire with multi-ply casing construction to handle heavy workloads. Its five-rib, highway-oriented tread pattern allows for maximum trouble-free miles while its beefy, solid shoulder design resists scrubbing. Double steel belted plies provide puncture resistance and durability. The CLT is backed by a Limited Protection Policy on all sizes.

The ST Radial is the workhorse of the Americus lineup. Americus designed this Specialty Trailer tire with a micro-positioned fiber reinforced belt package for extra strength and durability. The tread design supports low rolling resistance and improved heat dissipation, enhanced hydroplaning resistance, and increased stability. The ST is backed by a Limited Protection Policy on all sizes.

25/365 LIMITED PROTECTION POLICY

All Americus tires are backed by a No Questions Asked, 25/365 Free Replacement Limited Protection Policy and an unbeatable mileage policy (where applicable). The policy fully covers (100%) all Americus brand radial passenger, light truck, and specialty trailer tires should one become unserviceable due to defective workmanship, materials, or road hazard during the first 25% of useable treadwear or one year from date of purchase, whichever occurs first. ●

★ AMERICUS

Built For The American Road

All New RUGGED A/TR^R

The Americus Rugged A/TR is our next generation aggressive all-terrain tire designed for your everyday commute and your off-road adventures. With advanced 3D siping technology, rigid interior tread blocks, enhanced 3PMSF tread compound, the Rugged A/TR provides exceptional handling on wet and dry surfaces, while the massive and studdable shoulder lugs drive through mud, snow and ice with ease. Carrying an upgraded 50,000 mile limited treadwear protection and our No Questions Asked, 25/365 Free Replacement Limited Protection Policy on all sizes, the Rugged A/TR is ready for whatever path you follow.

RUGGED A/T

The Americus Rugged All-Terrain is an aggressive on and off-road SUV and Light Truck radial built for American adventures. The unique connected-center-rib design offers a stable footprint on and off-road. Variable circumferential grooves and shoulder design reduces highway noise and hydroplaning. The Rugged All-Terrain is backed by our No Questions Asked, 25/365 Free Replacement Limited Protection Policy.

RUGGED M/T

The Americus Rugged M/T is a premium high-void mud pattern with large shoulder blocks for deep traction and crisp handling in on and off-road conditions. The self-cleaning tread has "thunder-bolt" stone ejectors. The joint-less spiral nylon over-wraps provide extra toughness and 3-ply body plies (in larger sizes) helps protect against sidewall impact. The Rugged M/T is backed by our No Questions Asked, 25/365 Free Replacement Limited Protection Policy.

RECON CUV

The Americus Recon CUV features an all-season silica-based compound which improves wet and dry traction and provides long wearing durability. Proven tread design ensures quick and efficient water evacuation and traction in all conditions. The Recon CUV is backed by our No Questions Asked, 25/365 Free Replacement Limited Protection Policy.

Autocar, LLC

THE ALWAYS UP PREMIUM VOCATIONAL TRUCK MANUFACTURER

The Autocar brand carries a rich history dating back 125 years. Autocar, LLC is a proudly 100% American-owned severe-duty original equipment manufacturer with all its premium hand-built trucks assembled in the USA. Autocar is the industry-leading vocational truck OEM, specializing in trucks ranging from refuse and concrete and construction to premium terminal tractors for the logistics industry. Autocar's vocation-based business model and customer obsession sets the brand apart from any other truck manufacturer.

THE REVOLUTIONARY OEM

Autocar's difference from other OEMs begins when a customer orders a truck. The Autocar sales team and engineers work closely with the customer to custom engineer each truck to fit their exact needs and vocation. This allows Autocar to build a premium tool that is built right the first time for the rigorous demands of the specific vocation it serves. Autocar also does not design any proprietary parts into its trucks, allowing the customers flexibility in the event of repairs. Additionally, Autocar creates the best "Always Up" customer experience by providing customers with 24/7 access to technicians through Autocar Solutions Always Up service.

As a proud American-owned truck manufacturer with all of its assembly plants in the United States, Autocar stands behind its quality guarantee for any truck that leaves the assembly line, arriving ready to work and get the toughest jobs done-done! Whether the need calls for a truck for refuse, logistics, concrete, or construction applications, every premium Autocar truck is custom engineered for the specific work environment.

THERE'S POWER IN ELECTRIFICATION

As a leader in truck innovation, Autocar is at the forefront of alternative fuel options and electrification. The E-ACTT terminal tractor, Autocar's first all-electric terminal tractor, is as powerful as its diesel counterpart and helps fleets meet their environmental, social, and governance (ESG) goals. While the emissions reductions are key, so are the electric yard truck's significant financial savings with reduced maintenance and no fuel costs.

The clean-powered E-ACTT is a tool for productivity, removing approximately 100 metric tons of CO2 per year. Equipped with leading-edge temperature-controlled lithium-ion battery technology and an onboard charging system, the E-ACTT offers a battery cycle of up to 22 hours per charge and charges from 10% to 100% in just two

hours. Autocar engineers designed the technology in-house, taking into consideration the demands of its severe-duty applications and its 24-hour operation.

Autocar engineered its battery-powered yard trucks for spotting trailers and containers at docks, yards, ports, intermodal facilities, and distribution centers.

The E-ACTT features over 85% of the parts from its diesel counterpart, the ACTT, and is equipped with features for making the transition to EV seamless, such as:

- CCS-1 compliant DC fast charging
- Liquid cooled batteries
- Up to 210 kWh modular battery packs
- Up to 22 hours runtime on a single charge
- 85% of parts carried over from the diesel ACTT to the E-ACTT
- Technology designed in house

The E-ACTT is a tool engineered to meet corporate goals and compliance regulations while meeting the industry's most demanding challenges.

EXPERIENCE ALWAYS UP

The most important journey for any Autocar truck begins upon customer delivery. Autocar takes full responsibility in ensuring the truck is ready to work and conquer the toughest jobs thrown at it. Autocar's purpose-built, premium tools are built to last.

Autocar's dedication to manufacturing custom-engineered and handmade trucks may not always be the simplest way, but to Autocar, it's worth it. Because in the end, everything Autocar does is focused on making its customers and its trucks successful. ●

BOSS Industries

INNOVATIVE ENGINEERING AND EXCEPTIONAL CUSTOMER SERVICE

Established in 1988 by brothers Patrick and Paul Wilkins, BOSS Industries, LLC supplies innovative engineered solutions for truck-mounted air compressors and generator systems for the demanding vocational work truck market.

Based in LaPorte, Indiana, BOSS Industries has remained loyal to the surrounding community to ensure a quality, Midwestern-built American product.

With the dedication of its employees, BOSS has grown to be an industry leader by listening to the needs of the industry and designing products that provide a superior value for its customers. BOSS strives to offer a user-friendly product that minimizes downtime while providing the lowest cost of ownership. Fleet managers often consult BOSS staff to assist in supplying the right product for the application, while ensuring proper integration to service vehicles with various other pieces of equipment.

CONTINUALLY MOVING FORWARD

Entering 2023, BOSS will celebrate its 35th year in business, and its vision has not wavered. BOSS

Industries' mission statement says it all: "To supply customized mobile power systems utilizing innovative engineering while providing an exceptional customer experience!"

While BOSS Industries' primary focus has been integrated underdeck rotary screw and generator systems for the work truck industry, its advancement in engine-driven products, abovedeck hydraulic driven products, tool lifts, and industry leading BA440 hydraulic-driven reciprocating air compressor have added to its growing portfolio of products. Those innovations also add continued product awareness to BOSS customers. Today, BOSS accounts for more than 50% of all PTO rotary screw compressor sales. Additionally, BOSS Industries is an OEM provider for multiple product lines that are leaders in their respective marketplace.

Beginning in 2003, BOSS entered the vapor recovery and gas booster market. BOSS Industries' rotary screw products are a critical element in the oil and gas sectors. BOSS offers complete kits or separate components for electric-powered or natural gas-engine driven units.

BOSS entered the railroad maintenance of way and spray coatings markets with the acquisition of HIPPO Multi-products in November of 2021. Building on its foundation of air and generation power, BOSS Industries' advancement into the rail and spray foam marketplace is another step forward in providing quality products to a new and expanding territories.

SUPPORTING CUSTOMERS

BOSS Industries' product support team has the knowledge and tools that customers demand to keep them "on-the-job" with minimal downtime. For customer convenience, BOSS features an online parts store to help with maintenance and common replacement items. For additional support, BOSS launched an industry-first BOSS APP that instantly connects customers to products and other important items, such as manuals, service items, service training opportunities, and more.

BOSS air and power products are used extensively in gas and electric utility companies, municipal water and sewer departments, tire service, mechanic service vehicle, telecomm companies, paint striping, DOT, rental industries, drilling and mining, department of defense, landscape and irrigation, oil and gas, railroad, vacuum excavation, and spray foam insulation to name a few.

BOSS Industries operates across the world through its distributor network. BOSS Industries, LLC is a portfolio company of Wynnchurch Capital, LP (Rosemount, Illinois). ●

BOSS[®]
engineered **AIR/POWER** systems

Extendobed

LOOKS TOUGH. WORKS TOUGHER.

Why climb in the back of your truck or van when you can slide everything out to you? Since 1987 when it was invented, Extendobed has built the most heavy-duty sliding deck systems to increase efficiency and improve safety in a variety of industries. The sliding deck can be used as is or an optional custom cargo carrier can be added to organize tools, secure storage, transport equipment, facilitate loading/unloading, and eliminate the need to crawl around in your vehicle. Even companies with service bodies have been retrofitted with Extendobeds to make staff more efficient, reduce injuries, and eliminate the “8-ft trashcan” seen in many service bodies.

Extendobed has already been proven by established companies such as ConocoPhillips, Dow Chemical, Dominion Energy, Idaho Power, and SW Gas, as well as the US Military, FBI, Homeland Security, and over 1,500 fire and police departments who choose Extendobed because of its durability, versatility, and long product life.

ONLY EXTENDOBED OFFERS

- Extension past the taillights™ (over 110%) providing access to the entire bed.

- Up to 3,000-lb capacity.
- Free, customizable designs for vans, trucks, and service bodies..
- 20-year limited warranty resulting in lower cost of ownership.

FAST ROI: CASE STUDY

Due to increased efficiency provided by Extendobeds, a pest control company found that each of its 200 vehicles can service an average of four additional clients per week without adding personnel or vehicles. At an average charge of \$80/month, that’s an additional \$3.3 million in annual revenue capacity. ROI was only 3.2 months, which does not include cost savings from the reduction of workplace injuries by over 50%.

DOUBLE YOUR VAN STORAGE CAPACITY

Extendobeds will revolutionize the way you store and access equipment and supplies on your fleet of work vans. Stop climbing into your van for equipment/supplies. Slide it out to you using a made-to-order Extendobed.

EXTENDOWALL

The new ExtendoWall™ is designed to further improve the efficiency and productivity of work vans. The fully customizable ExtendoWall can carry ladders, tools, and supplies and can be designed to extend from either the side or the back doors. Every system is built to order and provides the following benefits:

- Doubles the storage volume over traditional shelf/drawer systems.
- Increases productivity of work crews by helping them get on/off jobsites quicker.
- Reduces injuries—no more lifting heavy items from awkward positions or climbing in and out of a van, injuring knees, ankles, and backs.

CARGO LENGTH	ROOF HEIGHT	APPROX STORAGE VOLUME	
		EXTEND-OBED VOLUME (CU FT)	TYPICAL STORAGE SYSTEM (CU FT)
10.5 FT	LOW	180	90
10.5 FT	MEDIUM	233	117
12 FT	LOW	207	102
12 FT	MEDIUM	268	132
12 FT	HIGH	303	149
14 FT	HIGH	303	184

As seen in the chart above, Extendobed more than doubles the total storage capacity over traditional shelf/drawer storage systems by fully using the “dead space” in the middle of the cargo area.

Tip: A half-width ExtendoWall mounted to slide out the back or side door combined with a traditional shelf system for the other side is an option for those that may need both types of storage systems.

REDUCE INJURIES

As mentioned, Extendobed will also help reduce injuries to backs, shoulders, knees, and ankles because workers are not picking up heavy items from awkward angles or climbing in and out of their trucks or vans multiple times per day. ●

Isuzu Commercial Truck Of America, Inc.

A TRUCK FOR EVERY NEED, OFFERING INCREASED PRODUCTIVITY AND NATIONWIDE SUPPORT

Isuzu Commercial Truck of America, Inc., is the distributor of Isuzu commercial vehicles in the United States—the best-selling low cab forward trucks in America every year since 1986. There’s a simple reason why these trucks have gained such popularity: Isuzu has the right truck for all your business needs.

EXTENSIVE LINEUP

Isuzu offers the widest range of low cab forward trucks available:

Class 3-5 Isuzu N-Series V-8 gas trucks—driven by a powerplant with an engineered design life of 200,000 miles. These are the only low cab forward gasoline-powered trucks with GVWRs ranging from 12,000 to 19,500 lbs. Accommodating up to 20-ft bodies, Isuzu N-Series gas trucks are available in both Standard and Crew Cab configurations. Class 3 and 4 gas trucks are currently available; Class 5 gas models will be available in mid-2023.

Class 4 and 5 Isuzu N-Series diesel-powered trucks—equipped with the legendary Isuzu 4HK1-TC engine that boasts a B-10 durability rating of 375,000 miles. The trucks that made Isuzu famous are available in Standard Cab with three-across seating or a Crew Cab that will handle up to seven and with wheelbases from 109 to 212 inches in length.

Class 6 and the all-new class 7 Isuzu F-Series trucks—featuring the most powerful Efficiency Series variant of the proven Cummins B6.7 diesel engine for the optimum in performance and economy. Isuzu F-Series trucks are available in both Class 6 and new Class 7 models with GVWRs from 25,950 to a whopping

33,000 lbs. With eight wheelbase choices, Isuzu F-Series trucks can handle bodies up to 30 ft in length.

INCREASED PRODUCTIVITY

You can reach more tough-to-navigate locations and make more stops thanks to Isuzu trucks’:

MANEUVERABILITY: Isuzu trucks’ cab-over-engine design gives a turning circle dramatically tighter than any conventional cab.

VISIBILITY: Between their low cab forward design and wide expanses of glass, these trucks allow drivers to see objects as close as 8 ft ahead—far better visibility than you’d find in a conventional cab.

ECONOMY: Fewer stops for fuel means more time moving your business forward.

LOW COST OF OWNERSHIP

Isuzu trucks are famous for their low cost of ownership, thanks to their efficiency and dependability, plus:

- Outstanding basic limited warranty protection for a minimum of 36 months, with extended warranties available for as much as five years/250,000 miles

- 24/7 roadside assistance for the length of your warranty or extended warranty

- Isuzu’s Priority Service Maintenance Program, which allows you to lock in today’s maintenance service prices for up to six years—and the cost can be included in your Isuzu Finance of America finance or lease contract

- Isuzu FleetValue parts, priced to compete with aftermarket parts but engineered to meet Isuzu’s stringent specifications in addition to Genuine Isuzu OEM parts

- Vehicle Health Reports produced by every Isuzu N-Series diesel truck that show idle time, speed history, acceleration frequency, and more, so you can optimize your truck’s efficiency by monitoring and making adjustments to driving habits

NATIONWIDE SALES & SERVICE

Isuzu trucks are sold and serviced in all 50 US states, which means there is probably an Isuzu dealer near you wherever you are—or wherever your truck takes you. ●

PeakPTT

NATIONWIDE PUSH-TO-TALK FOR BUSINESS

Want one-touch instant communication that connects managers with their entire workforce in less than one second? PeakPTT provides affordable, purpose-driven, long-range push-to-talk radios that include nationwide push-to-talk service. Further, PeakPTT ships its radios direct to businesses, ready to use right out of the box.

messages, or wondering the location of field personnel ever again.

PEAKPTT FOR BUSINESS

PeakPTT offers push-to-talk radios and nationwide PTT service, which will enhance the way your team connects. Because PeakPTT provides PTT radios ready to go right out of the box, your operations can be up and running—fast.

PeakPTT push-to-talk systems are easy to use and built for business. The company leverages the internet, cellular data, and Wi-Fi networks to transmit voice communication. PeakPTT service for fleets includes:

- Rugged Devices
- Real-time GPS tracking
- Nationwide coverage
- Instant communication, meaning no delays

With PeakPTT’s push-to-talk radios, fleets will no longer experience missed phone calls, ignored text

WHAT IS PUSH-TO-TALK?

For those that are unfamiliar, push-to-talk is a method of voice communication that allows operators to simply press a button for instant and secure communication. Push-to-talk works on many types of devices: dedicated PTT devices, smartphones, and even computers. Similar to a Walkie Talkie, users can talk to many devices at once or privately one-to-one. And because PeakPTT leverages the internet, cellular, and Wi-Fi networks, fleets using PeakPTT can communicate across the street or around the world.

SMARTPHONE VS PEAKPTT

On Average, a PTT call lasts 15 seconds versus more than 50 seconds for a traditional call. This is a huge time waste for companies where time

is of the essence. Not to mention, cell phones are expensive. Therefore, Peak PTT will boost your company's productivity, while significantly saving your company a lot of money.

TRADITIONAL RADIOS VS PEAKPTT

LMR or Land Mobile Radios are limited by distance, in many cases require government licenses, and can be very expensive to set up and maintain. As mentioned before, PTT Over Cellular leverages existing cellular data, Wi-Fi networks, and the internet—offering instant and secure talk.

ELIMINATE DISTRACTED DRIVING

Let's face the facts: Talking and texting while driving poses a tremendous liability to companies today. The Peak PTT Walkie-Talkie radios will instantly eliminate this liability. The PeakPTT radios' "Walkie-Talkie" form factor meets DOT compliance requirements.

REAL-TIME GPS TRACKING

Not only is each PeakPTT device a radio, it is also a GPS tracker. Positions are updated every 60 seconds, so managers always know exactly where their employees are at any given moment.

PEAKPTT

PeakPTT was founded in 2018 and is located in Santa Clarita, California. Accountable for its actions, PeakPTT operates with the highest levels of integrity and with a sense of urgency to get things done. The company provides its customers with best-in-class customer service and support. ●

Find out more, visit www.peakptt.com or call 855.600.6161.

NATIONWIDE PUSH-TO-TALK IS BACK!

PeakPTT is a manufacturer of next-generation Push-To-Talk radios. Its two-way radio service leverages LTE wireless data, the internet, and rugged, purpose-driven hardware that provides businesses instant, always-on two-way radio service.

- No more missed phone calls
- No more ignored text messages
- No wondering your field personnel's location
- No more time wasted (the average length of a PTT call is 15 seconds)

- IP67 and IP68 Rated
- Waterproof
- Drop resistant
- Feature long battery life
- Equipped with extra loud speakers
- Handheld and mobile devices available

GETTING MORE DONE

Answering phone calls and sending and receiving text messages are a waste of time. With PeakPTT your business communication will receive a 10-times boost in productivity with instant talk. This means:

PTT SERVICE INCLUDES

- Nationwide 4G LTE PTT coverage
- Instant communications—less than a second
- Unlimited channels
- Private, one-on-one calls
- Secure and encrypted communications
- Record calls with instant playback and timestamp
- SOS and lone worker notifications
- Cross talk between different companies
- 60 second GPS tracking

WORKS OUT OF THE BOX

PeakPTT radios arrive ready to use out of the box. Wireless LTE data on a Tier 1 carrier is included in the service—no programming or setup needed. PeakPTT can also customize radio names and create an unlimited number of additional channels. Further, PeakPTT can work without a base station. In fact, with PC dispatch software, fleet managers can have one or multiple dispatchers located in different locations, communicating with field workers.

RUGGED DEVICES

PeakPTT uses purpose-built, rugged radios that are built for business use. Its devices are designed to handle some of the most challenging work environments. This means the devices are:

PPG

PPG'S COMMERCIAL COATINGS HAVE IT COVERED IN TECHNOLOGY, COLOR, AND SERVICE

PPG is a leading innovator of coating technologies for just about every industry imaginable with a wealth of coatings options available for work trucks. The applications range from heavy-duty trucks and custom truck bodies to transit vehicles, trailers, fire and emergency, as well as equipment for the agricultural, construction, and gas exploration industries.

PROVEN TECHNOLOGY FOR DIVERSE NEEDS

PPG's full range of coatings technologies includes polyurethanes, alkyds, epoxies, polyurea, powder coatings, and pre-treatments. Coatings are marketed under several brand names—each offering products and price points geared for specific market segment requirements:

- **DELFLIET ONE®** premium paint system delivers excellent color matching, durability, and ease of use, while offering the industry's lowest VOC ratings for undercoat and topcoat products. It's available with five- and seven-year warranty options.

- **DELFLIET ESSENTIAL®** compact, value-driven paint system is easy to use and cost effective, available in two- and three-year warranties.
- **PPG VERSOLON™ Solutions** offer technologies for specialized equipment and manufacturing uses—from economical alkyds and epoxies to urethanes, waterborne, and powder coatings.
- **AMERCOAT®** line of heavy-duty protective coatings includes tank linings, zinc-rich primers, epoxy primers, and other durable finishes.

SPECIAL REQUIREMENT SOLUTIONS

PPG offers many specialty coatings options, ranging from those having unique performance properties to environmentally progressive, ultra-low VOC solutions. Among the options are specialty coatings for enhanced graffiti resistance, sound dampening, and the latest advancements in corrosion and chemical resistant technologies.

COLOR MATCHING TOOLS

PPG's comprehensive color database offers hundreds of thousands of

formulas, covering a full spectrum of solid, metallic, pearl, and specialty colors. Color matching tools include the *Delfleet One* color chip deck: specialized color chip selectors for fleet vehicles, Class 6 through 8 OEMs, RAL, and market-specific colors. Formula look-up options range from online access to a full-blown, computerized paint management system—as well as an advanced spectrophotometer for matching difficult, unknown colors.

TRAINING & DEVELOPMENT

Dedicated PPG instructors teach training courses throughout the year at PPG Business Development Centers. Course topics include technician certification, spot repair, and color tinting, blending, and spray equipment for commercial use. And PPG's MVP Business Solutions program offers a comprehensive array of management training for businesses using PPG commercial coatings systems. The program provides business owners and managers with ideas, methodologies, and expert guidance for improving productivity and profitability.

SERVICE & SUPPORT

The core of PPG's commitment to customer support lies in its team of field commercial sales representatives, OEM specialists, and a network of some 500 US and Canadian distributors offering personalized service, technical support, and color matching assistance. ●

Find out more, visit www.ppgcommercialcoatings.com.

ALL YOU NEED IS ONE.

Great coverage. Exceptional durability. Easy to spray.

We collaborated with commercial painters and shop managers to develop an ultra-low VOC paint system that raises the bar for performance and productivity in every category that matters.

PPG Delfleet One®

Reading Truck

WORKING HARD FOR THE HARD WORKING

Reading Truck is a leading manufacturer and distributor that has designed and built work truck bodies with outstanding craftsmanship for more than 65 years. Owners depend on Reading Truck for safe, durable truck bodies, expert installation, and all the parts, equipment, accessories, and services required to get the job done.

Reading Truck products are available through its extensive national network of distribution partners or through any of the company's 20 Reading Truck locations. Fleet owners will find everything needed to outfit a single truck or an entire fleet.

ALWAYS ON THE JOB

Just as Reading Truck takes pride in its manufacturing, the company knows its customers take pride in truck ownership. Reading Truck's innovation and craftsmanship provide the sureness in its products from decades of dedication to customer satisfaction. Reading Truck manufactures reliable, long-lasting solutions to make owners' lives easier and make the most of every workday.

- Service bodies for any size or class—aluminum or steel, light- or heavy-duty, for single-wheel and double-wheel chassis.

- Enclosed service bodies providing year-round, all-weather protection for crew, tools, and equipment.
- Hauler and platform bodies are engineered with safety and visibility in mind. With a corrosion-resistant, ergonomic design, these truck bodies provide great stability for hauling.
- Landscaper and dump body designs serve small and large purposes. From the backyard to the construction site, Reading Truck landscape and dump bodies allow operators to get the job done by efficiently managing projects.
- Crane bodies provide an innovative portfolio of light- and heavy-duty options designed for unsurpassed power, productivity, and protection, helping operators safely move items around the worksite.
- Contractor bodies are built to withstand the toughest conditions—ready to perform with their customizable design and workspace so operators can work the way they want.

FULLY OUTFITTED FOR YOU

With 20 Reading Truck Centers across the country and an extensive distribution network ready to serve, Reading Truck's knowledgeable installers, upfitters, and technicians offer professional, personalized expert consultation and support to add value to the overall cost of ownership. Whether it's having storage for that specialized tool, exterior lighting for dawn and dusk projects, or master-locking steel slide bars for instant security and peace of mind, Reading Truck outfits and customizes to the need. Or, from planned preventive maintenance to annual certifications and equipment inspections, to emergency repairs and accessory installations, Reading Truck is here for the scheduled and unscheduled truck life moments.

From designing, building, outfitting, and servicing, you only need one place, whether you have one truck or an entire fleet. Reading Truck knows you're not just buying a truck; you're building your future. ●

Find out more, visit www.readingtruck.com.

BUILT TO THE TOUGHEST STANDARDS: YOURS.

Presenting Our New Contractor Body.

You know Reading Truck for its commitment to customers, innovation and its more than 65 years of manufacturing excellence. We have taken that engineering expertise and your feedback to deliver a Contractor Body — expanding our offering of durable work truck bodies built with long-lasting American craftsmanship. Our new Contractor Body is built to withstand the toughest conditions with its A60 galvanized steel construction, E-coat primer and powder-coat finish.

Ready to perform with its customizable design and workspace so you can work the way you want.

Samlex America

MOBILE POWER SOLUTIONS FOR WORK TRUCKS

For over 30 years, Samlex America has been an industry leader in manufacturing commercial power conversion products for utility, construction, transportation, and other fleet customers throughout North America and worldwide. The company serves both national and regional fleets through its relationships with upfitters and OEMs. Samlex has the largest offering of inverters in the industry, so no matter the application, Samlex can find the right fit.

Samlex power conversion products help ensure crews have access to the power they need to use the tools and electronics they rely on to perform their jobs efficiently and safely. No matter what remote, backup, or mobile power application requirements the job calls for, Samlex products fit the bill. Samlex serves a wide range of commercial industries, including construction, public safety, government, utilities, telecom, oil and gas, and custom applications through OEM programs.

RELIABLE BACKUP POWER

The reality is that power outages happen. Therefore, a backup power supply is an essential element in work trucks, field offices, or construction sites. The EVO™ Inverter/Charger Series in combination with your vehicle’s alternator or battery bank is the most cost-effective, reliable power system to keep critical systems and crew safe and productive. In this all-in-one unit, operators get a pure sine wave DC-AC power inverter, adaptive battery charger, and integrated transfer relay switch. It is available in 1,200W to 4,000W units, has one or two AC inputs (depending on size) for an alternator, generator, and/or grid power. It also connects to solar with a 50A DC input.

REDUCE ENGINE IDLING

Adding a Samlex Inverter/Charger System to a work truck allows the operator to use their electrical devices and tools without idling, transferring these loads to grid power when available and using this incoming power to charge batteries. This helps reduce both fuel consumption and engine wear, resulting in significant savings over time. The EVO Inverter/Chargers come with a surge rating of three times its continuous power output, allowing work truck operators to run high-surge tools and equipment that require heavy power on start-up and longer run times.

CLEAN, RELIABLE AC POWER

Samlex has the widest range of power inverters in the industry; no matter what the application, Samlex has the solution. The PST Series is the Samlex flagship line of pure

sine wave inverters designed for heavy-duty, commercial use for all work and utility trucks. The PST is available in both 12V and 24V models and comes with a remote On/Off switch and hardwire options. The NTX Series of inverters are a compact power solution, fitting well into small storage spaces in work vans and trucks. Products in the NTX Series are less expensive than the PST Series due to a no-hardwire capability. Samlex inverters provide robust power to all the electrical tools and equipment so that the truck operator can focus on the job at hand knowing they have all the power they need, anytime and anywhere.

BATTERY PROTECTION & MAINTENANCE

Batteries are expensive, and improper protection and maintenance shortens their life expectancy. Samlex has a full range of battery protection products including battery chargers, battery guards, and battery maintainers. Samlex also carries portable solar charging kits. The MSK Series comes in a 90W or 135W option, and all necessary parts and a convenient carrying case for a plug-and-play solar charging system are included.

TECH SUPPORT AVAILABILITY

Samlex is proud to provide the best customer service in the industry. When calling for support, customers will speak to a person right away—no automated prompts to navigate. Samlex understands downtime is costly and offers an Advanced Replacement Program on all products to keep fleet operations up and running. ●

Find out more, visit www.samlexamerica.com/fleet or call 1.800.561.5885.

Systainer Systems

COMBINING BOTT SMARTVAN AND SYSTAINER

With over 90 years of industry experience in manufacturing van shelving with bott and nearly 30 years of providing mobile and linkable storage systems through TANOS, Systainer Systems is a joint venture offering a truly efficient mobile solution. Combining bott Smartvan and systainer®, Systainer Systems creates a fully customizable mobile solution that restores productivity while maintaining the driver's safety and demonstrating professional integrity.

INTEGRATED STORAGE

Systainer³, the third generation of systainer®, are stackable, lockable, and fully integrated into the bott Smartvan line using guiderails that easily install into the racking. This means that any Systainer³, including the ones used for Festool tools, glide in and out of the racking with ease.

INDIVIDUALIZED

The racking itself is fully customizable to a fleet's van model and workflow. And the customization doesn't end after installation. All accessories can be moved around without having to uninstall the racking, so when a new project begins, a new tool purchased, or something large requires transportation, the shelving system can adapt around the workflow with ease.

WIDE RANGE OF ACCESSORIES

Whether a fleet needs to store the smallest washer in an organizer or strap a full pallet into the van's cargo area, bott Smartvan has an accessory that will help. The racks can be fitted with shelves, systainers®, cable reel shelves, and Perfo panels (mobile pegboards) with accessories to hold first aid kits, shop towels, and more. Ratcheting straps are available to attach to mounting points on the bottom of the frame, and anchor points can be added to any part of the racking frame. The possibilities are endless for van setup.

NO DRILLING, NO DAMAGE, NO FUSS

Don't cause any damage to a fleet vehicle. These systems come with vehicle-specific brackets that allow fleets to attach the racking to the vehicle without drilling a single hole. All mounting points align with existing factory-drilled holes. There's also no need to spend more on a professional installer. bott Smartvan's products can all be installed with just one person in one day. The faster fleet vehicles go into service, the sooner they are supporting company objectives.

LIGHTWEIGHT

bott Smartvan's storage systems are light. Whether the

concern is gas prices or battery life, having less weight in the back of the van makes a big difference.

KEEPING YOU & YOUR EQUIPMENT SAFE

bott Smartvan is one of the only van equipment lines that is crash tested according to the European standard ECE-R17.

TIME IS MONEY

How many hours do workers waste going back and forth to their vans and looking for that one tool or that one piece of hardware? How many times have they gone back to the hardware store to buy something they couldn't find just to find it hours later? It's all "organized chaos" until it's not, and wastes precious time that could be spent on the next job. Just 15 minutes of inefficient workflow a day equates to 65 hours of wasted time per year.

OPTIMIZE FORECASTING & REDUCE INVENTORY LOSS

Prevent stock outs and unscheduled restocking, reduce inventory levels, and implement inventory policies for employee accountability. Fleets lose millions of dollars in inventory loss every quarter. There's no need to implement expensive inventory tracking solutions with bott Smartvan's fully organized mobile storage system.

QUICK & EASY PROCESS

Systainer Systems' value for time starts long before the equipment is installed. The company's online configurator allows fleets to choose exactly what they want for their vehicle, and its team is on standby, ready to answer any and all questions one may have. As soon as an order is placed through the configurator, customers will receive their order within 10 business days, so fleets can start saving time ASAP. Begin fleet van configuration at www.config.bottsmartvan.com/vehicle.

VIA Motors

CLASS 2-5 TAILORED ELECTRIC WORK TRUCKS THAT GET THE JOB DONE

VIA Motors designs and manufactures Class 2-5 electric work trucks, based on the company's industry leading "VDRIVE" skateboard platform.

VDRIVE BY VIA

The VDRIVE Skateboard allows for a 21-inch load floor height and a driver-forward design, opening up volume for the cargo area and improving the driver experience with a tight turning radius and low step-in height.

The flexible and scalable VDRIVE skateboard is available in 130-inch, 160-inch, and 190-inch wheelbases. Battery sizes range from 55 kWh, 82 kWh, 124 kWh, and 165 kWh. In short, the VDRIVE platform offers fleets and upfitters the ultimate in flexibility and can accommodate a wide variety of vehicle bodies.

Additionally, VIA markets the VDRIVE skateboard as a standalone unit, allowing other companies to use their own bodies and power their EVs with VIA's industry leading technology.

VTRUX BY VIA

VTRUX is VIA's flexible electric work truck platform, based off its VDRIVE system. VIA Motors offers a portfolio of body styles and upfitting solutions that all fit on its VDRIVE Skateboard. VIA makes it easy for fleets to upfit their preferred body style onto VIA's cab chassis and even sells directly to upfitters.

Applications

- Walk-in vans
- Dry boxes
- School/shuttle buses
- Stake trucks
- Ambulance/service trucks
- Cab/cutaways
- Standalone VDRIVE skateboard and more

BUILT TO LAST

VIA makes functional, reliable, and durable electric work trucks for the world's fleets. A VTRUX electric work truck saves fleets money with less maintenance and fuel costs than a fossil-fuel truck.

With the experience of an Original Equipment Manufacturer (OEM) and the creativity of a startup, the VIA team puts its proven automotive and technical talent to the test with rigorous development and launch discipline, delivering the electric work truck drivers deserve.

TRANSITION TO AN ELECTRIC FLEET MADE EASY

VIA makes it easy to transition to an electric fleet. VIA team members sit down with customers and walk through the process, helping them to spec out the vehicle that best suits their needs. VIA Motors is in a pending transaction with Ideanomics, a global group with a mission to accelerate the commercial adoption of electric vehicles. Once it becomes part of Ideanomics, VIA will offer a total package that includes charging infrastructure and financing, making it even easier for fleets to transition to electric drive vehicles. 

Find out more, visit www.viamotors.com.

If You Need It, We Will Build It.

Get The Job Done.

Get the work truck you need—all electric, functional, reliable, and durable. With our industry-leading VDRIVE skateboard, VIA's electric work trucks are tailored to what YOU need.

Don't just take what other EV companies give you. Talk with a VIA representative today and discover what your fleet can look like tomorrow.

VMAC

VMAC'S DTM70-H IS A PTO-DRIVEN AIR COMPRESSOR WITH HYDRAULIC PUMP

VMAC's DTM70-H multi-power system is a direct-transmission mounted PTO driven air compressor with a hydraulic pump. This innovative PTO driven air compressor system is the best choice for fleet managers and mechanics who need mobile compressed air and hydraulic power simultaneously.

This multi-power system allows mechanics to operate air tools at the same time as their hydraulic crane or other hydraulic equipment, making it the ultimate underdeck system.

FOR FORD SUPER DUTY WORK TRUCKS

Engineered specifically for 2020 and newer Ford F-250 to F-600 Super Duty 6.7-L Power Stroke Diesel trucks, the DTM70-H multi-power system was designed by VMAC for the easiest possible installation and optimal performance, all while keeping the vehicle's OEM warranty intact.

"This innovative system is application-engineered for Ford Super Duty work trucks and can be installed 30% faster than other vehicle-integrated systems," notes Mike Pettigrew, VMAC's marketing manager. "This is because no modifications are

required to the Ford transfer case, and no drive shafts are required. The DTM70-H system also frees up deck space and allows for reduced hydraulic plumbing, fittings, and hoses compared to deck-mounted hydraulic air compressors."

Those in the service truck industry considering a PTO-driven air compressor system are often concerned that an underdeck system will reduce the truck's ground clearance. The DTM70-H's installation does not change the ground clearance, ensuring it (and your truck) are protected on the most rugged jobsites.

VARIABLE AIR & STEADY HYDRAULICS

VMAC's DTM70-H produces variable air power and steady hydraulic power at the same time, up to 65 CFM and 8 GPM.

The actual CFM and GPM output of the DTM70-H varies based on truck model year, engine RPM, hydraulic pump size, and operating mode.

Fleet managers and mechanics can switch between fixed and variable operating modes. This option allows the operator to reduce engine RPM and minimize fuel consumption,

resulting in fewer emissions and a quieter jobsite.

"Fleet managers and operators with Ford trucks can take advantage of two operating modes with the DTM70-H," Pettigrew explains. "The first option is fixed mode, which maintains a pre-set low engine RPM for running hydraulic equipment and provides a steady rate of compressed air. The second option is variable mode, which enables the truck's engine RPM to increase and decrease automatically based on air demand while maintaining steady hydraulic flow. Whether the operator chooses fixed or variable mode, the DTM70-H will operate the hydraulic equipment, such as the crane, at its required speed."

DOWNSIZE OR LOAD MORE

The DTM70-H is lightweight; the entire system weighs just 180 lbs. The DTM70-H frees up truck GVW by as much as 600 lbs, as there's no air receiver tank to mount on the truck deck, and hydraulic tank sizes can be reduced by 50% compared to other hydraulic systems. Fleet managers and mechanics who choose the DTM70-H reap the weight benefits and can downsize their truck class or take advantage of the extra payload for loading up their trucks with more tools and equipment.

SHIPS IN 10 DAYS

VMAC's DTM70-H is manufactured in North America and has remained resistant to supply chain challenges. VMAC can fulfill orders for the DTM70-H within 10 business days. ●

Find out more about the DTM70-H, visit www.vmacair.com/dtm70h.

Frustrated with long lead times? VMAC DTM70-H air compressors with hydraulics ship in 10 days.

Supply chain shortages are causing significant deck mounted air compressor delays. We have a solution:

Our 65 CFM, 8 GPM direct-transmission mounted multi-power system is available today.

FIGHT CORROSION AND DIRT ON CAB FLOORS

Keeping the interior of work trucks clean is an arduous and sometimes impossible task. Off-road and abusive environments can wreak havoc on cab floors, costing companies money when it comes time to sell their own trucks or return leased trucks.

Nobody wants damage to the interior of the cab, yet in-cab corrosion is one of the costliest issues facing companies that run garbage haulers, cement mixers, or bucket trucks—just to name a few applications—because drivers constantly enter and exit the cab due to the very nature of the work.

Since harmful elements enter the cab unavoidably and spills originating on the inside do happen, prevention and cleaning are key.

TWO PROBLEMS, ONE SOLUTION

One solution that helps accomplish both is custom molded, tray-style floor mats.

The raised edge prevents damaging chemicals, accidental spills, and the usual dirt and grime from escaping the mats, which are easily removed to make the cleaning process significantly shorter. Clean the mats with a simple hose or pressure washer, and leave them to dry. Shortly after, the mats can be reinserted to make the cab floor look new again.

Custom molded, tray-style floor mats are perfect for work trucks. Keep your trucks clean and nice with this no-brainer accessory that adds real value to the truck. Improve

resale value and create cleaner/safer working conditions throughout the life of the truck.

Minimizer offers custom molded floor mats for more than 70 Class 5, 6, 7, and 8 trucks. Find your model easily by visiting the website. Use the Floor Mat Selector Tool to find individual part numbers and see local and online buying options. ●

Opti-Luxx

LED COMMERCIAL VEHICLE LIGHTING

Opti-Luxx Inc., headquartered in Hudsonville, Michigan, is a full-service supplier of LED commercial vehicle lighting. Opti-Luxx offers its customers the best in product development, application engineering, program management, and launch support for new and existing products.

Over 20 years ago, Opti-Luxx pioneered the use of LED lighting technology in commercial vehicle applications by developing the first LED school bus lights. It is an indisputable fact that school buses are the safest vehicles on the roads today, and as the leading supplier of LED school bus lighting, Opti-Luxx plays a significant role in that strong safety reputation. Today, the company has significantly expanded product offerings to cover the entire commercial vehicle market, including an extensive line of the brightest and best LED signal lighting, work lighting, and a new suite of lights for amber applications.

The new Opti-Luxx amber lineup provides innovative, durable, and cost-effective LED options for snowplows, utility vehicles, delivery fleets, agricultural equipment, and all work truck applications. Light formats include beacons, light bars, and warning lights for all vehicle types. Opti-Luxx delivers the brightest and best amber LED lighting products for increased visibility and safety and situation-specific flash patterns for any roadway scenario at prices that won't break the bank.

In addition to school bus, signal, work, and amber LED lighting products, Opti-Luxx also provides superior customer service before, during, and after purchase including:

- On-time delivery and short lead times
- Quality safety products
- Skilled and experienced production team
- Reliability
- Exceptional sales team
- Industry knowledge
- Expert technicians
- Continuous improvement

Opti-Luxx is committed to continuous improvement and providing all customers with exceptional value. For more information on the new Opti-Luxx amber line, the company has included all new amber products on its website and also displays several flash pattern previews on its YouTube channel. ●

PowerMate

SAFETY LIFTING TECHNOLOGY

PowerMate® is here to provide safety lifting equipment for one truck or an entire fleet. PowerMate can help make moving your loads of up to 1,500 lbs both safer and more profitable.

PowerMate Motorized Stair Climbers, LiftGates, and LiftTables have been in business under the same continuous ownership since 1976. Its lifting equipment is used by a large number of companies to safely and efficiently move heavy loads.

PowerMate's Stair Climber is great for moving loads up and down stairs, and its tailgate lift moves loads off and on pickup trucks. The lifts can move across flat surfaces as well as rough terrain. And finally, several models can stack and/or vertically lift.

WHY USE POWERMATE

PowerMate lifts improve operator safety. PowerMate requires 87% less effort for the operator than a traditional hand truck. This reduces fatigue and the risk of injuries. The PowerMate also reduces labor requirements by 50%.

Instead of using two or four teammates for the job, only one or two teammates are required. PowerMate also provides the potential to complete 20 to 40% more jobs per day. Saving time and labor improves your professional image and grows your profits, not to mention saving money spent on costly injuries, property damage, and potentially even lowering insurance costs. ♦

Find out more, visit
www.powermate.info.

SAVE TIME, MONEY, AND BACKS!

LP International Inc. the manufacturer of the PowerMate® brand of motorized stair climbing hand trucks, LiftGates (interior tail gate lifts), and LiftTables is here to provide safety lifting equipment for one truck or your entire fleet of trucks.

If you and your Team are challenged with moving heavy and awkward loads weighing up to 1,500 Pounds or 680 kilos. PowerMate can help make your moves both safer and more profitable.

Pressure Systems International

TIREVIEW TPMS & TIREVIEW LIVE

Pressure Systems International (P.S.I.®) is a global leader in onboard tire management systems including automatic tire inflation systems (ATIS), tire pressure monitoring systems (TireView® TPMS), and the TireView LIVE™ data analytics portal that delivers real-time tire health.

According to a Federal Motor Carrier Safety Administration (FMCSA) study, the use of tire pressure systems can improve fuel economy by approximately 1.4%. TireView TPMS and P.S.I.'s automatic tire inflation system (ATIS) together offer a complete tire management solution for commercial fleets.

P.S.I. TIREVIEW TPMS

TireView TPMS monitors any commercial vehicle tire pressure and

temperature. Independent third-party testing demonstrated the data reliability that TireView delivers relative to competitors and ensures that the data gets where it needs to be. The reliability is underscored with over 1.8 million sensors in the market. With numerous sensor configurations, fleets can easily customize TireView to their specific needs with the added ability to mix and match on the same vehicle. The optional Flow-Thru kits provide added convenience when mounting cap sensors to dual tire configurations, such as the drive axles, and eliminates the need to remove the sensors when adding air.

TireView LIVE telematics is a fleet-wide solution for tire management. Fleets recognize the need to be

proactive in tire management. Critical to achieving that goal is the ability to send the tire data via telematics back to the operations team. TireView LIVE is a focused data analytics portal. Through the analytics of stored data, which combines pressure, temperature, location, and other data, the platform provides the ability to see a fleet's tires at a glance for a more complete understanding.

P.S.I. designs all its solutions to be easily retrofittable to existing equipment. And with an ROI of typically less than one year, retrofitting P.S.I. products is very common. ●

Coxreels

TDMP SERIES

Designed for use with hydraulic tools and accessories, Coxreels' TDMP Series features:

- Dual hydraulic spring rewind reels with one-sided access for both the spring and the swivel
- Supply and return lines in the same side of the reel into an external fluid path via hydraulic swivel that also houses a spring cartridge motor
- A unique design that allows service of the main components without removal of the reel
- Improved space use: Reel can be installed with the back side of the drum against a wall without concern for incoming hose lines
- A capacity of up to 50 ft with triple axle support, dual arm guides, and stainless steel hose guide rollers
- Heavy gauge steel construction, durable polyester powder coat, rolled and ribbed discs, an industry leading two-year warranty, and manufactured in the USA.

Vehicle Security Innovators, Inc.

THREE BRANDS WITH MORE THAN 70 YEARS' EXPERIENCE IN THE INDUSTRY

Vehicle Security Innovators, Inc. located in Green Bay, Wisconsin, is aimed at protecting freight and cargo for the transportation industry. The company is comprised of the following three distinct business units:

VSI Security Solutions (www.vsilocks.com). VSI Security Solutions designs, produces, and sells automotive-grade locksets and keys for OEM applications. Its products are made in the USA.

Pop & Lock (www.popandlock.net). Pop and Lock is a world leader in aftermarket security products, providing mechanical and electronic locking solutions for tailgates, truck caps, and tonneau covers.

Freight Defense (www.freightdefense.com). Freight Defense designs and assembles aftermarket locksets, keys, and security solutions, focusing on protection of light, medium, and heavy-duty fleets. The brand ensures quality control and the ability to offer security hardware solutions tailored to specific needs.
